# DIURETICS

A diuretic is any substance that promotes diuresis, the increased production of urine. This includes forced diuresis. There are several categories of diuretics. All diuretics increase the excretion of water from bodies, although each class does so in a distinct way. Alternatively, an antidiuretic such as vasopressin (antidiuretic hormone), is an agent or drug which reduces the excretion of water in urine.

## Below listed the Orbit's Portfolio

NAME
Furosemide Injection BP 10 mg/ml
Furosemide Tablets BP 50 mg
Furosemide Tablets BP 40 mg
